Deputy Vice-Chancellor scholarships

May 2019

$500 Scholarship award for having average of over 80% (Year 3, My average was 84%)

ADDITIONAL INFORMATION

I just graduated from University as a Computer Science student. My strongest abilities and skills are that I learn very quickly and have great logical thinking and problem solving skills. I always enjoy learning more and writing high quality and efficient code. I try to write code cleanly, organized, and easy to follow. I have experience with creating websites in which one was for a client (through the University) and one was for a Web Development class.
